

“Responder MAP gives me ‘the whole picture’ of unit floor activity, allowing me to productively address critical issues.”

The NET Effect

Nurse Call Made Easy

<< Responder NET’s user-friendly MAP makes handling nurse call activity easy. >>

Simple Nurse Call, Better Patient Care

Responder NET’s user-friendly MAP gives staff a complete view of unit floor activity on one graphic screen including patient calls, service requests, and staff location. MAP uses simple icons and colors to present nurse call activity on the unit, making it easy for staff to communicate and deliver quality patient care in a timely manner.

Quickly Locate Staff

The MAP view on Responder NET makes viewing staff locations easy from one simple screen. Responder MAP creates a graphical representation of the actual floor layout of a hospital. This makes staff location and nurse call activity easy to view. The staff name (option) and staff level are listed and allows for instant communication. In times of emergency, locating staff is critical. The Responder MAP translates this information quickly and effectively.

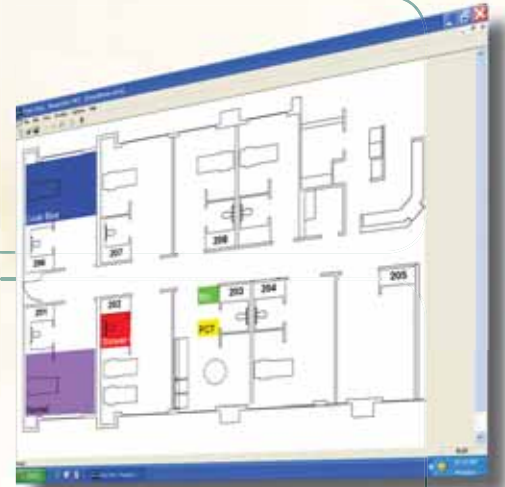

<< Responder MAP: Critical information, at a glance. >>

User-friendly screen for “quick” view of nurse call activity

- > View all nurse call activity from one simple graphic screen
- > Simple icons and colors to indicate emergencies and room status
- > Instantly view text messages and service requests with MAP view

Quickly Locate Staff Members

- > Re-creation of unit floor for easy viewing
- > Displays location of each staff member/level on one screen
- > Instantly contact caregivers for efficient communication
