

INTRODUCING THE Q6 SRS

The Qwizdom Q6 Student Response System is unique as it offers more opportunity for collaboration than with any previous system. Each remote offers an easy-to-use keypad similar to a cell phone, text input, and a larger LCD screen to view full responses. The small, ergonomic radio frequency remotes allow each student to communicate with the teacher up to 100 meters away and are durability-tested to withstand the rigors of the classroom.

As the teacher presents questions on a screen, verbally, or by using paper-based activities, pupils enter responses with their remotes. The teacher's computer instantly receives the responses and records the results, allowing the freedom to easily manage and control the format and speed of the lesson. The instant response also allows the educator to gauge students' overall comprehension or identify a struggling pupil. In turn, a student is notified when his response has been received and can silently signal the teacher for help, easing the fear of judgment by peers or falling behind in class.

DETAILS:

- 2-way RF technology based on 802.15.4 IEEE standard
- Large LCD display with right/wrong feedback capability
- Text questions display on screen
- Up to 100 meter range and 1,000 remotes per host
- Dimensions: 6 x 13.2 x 2.5 (cm) (WxHxD)
- Software integration with PowerPoint® (Actionpoint), Keynote® (Mactionpoint), and Qwizdom Connect authoring software
- Works with 100,000s of premade curriculum resource slides
- Question options include: Multiple Mark, Numeric, Sequencing, Rating Scale, Yes/No, Numeric (including fractions, decimals, and mixed expressions), Multiple Choice, True/False, Text Input, and Text Edit.
- 2 AA batteries—last a full year in typical usage
